Float Sixty

Retail Build-Out
Chicago, IL

Sequoia General Contracting Corp. was selected to construct a float studio in downtown Chicago. Over a period of three months we were able to transform a barren lower level space into Chicago's Modern Float Studio. Guests schedule sixty minute sessions and arrive to an inviting modern site fully equipped with private showers and state of the art float rooms, pods and tanks. The flotation equipment holds approximately ten inches of water and one thousand pounds of pharmaceutical grade Epsom salts creating a calming float retreat.
